H.A

Office Action Summary

Application No.

10/707,237

Applicant(s)

YU ET AL.

Examiner

Kenneth A. Parker

Art Unit

2871

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-13 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 1-12 is/are allowed.
- 6) ☒ Claim(s) 13 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. ____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date ____.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. ____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: ____.

Art Unit: 2871

DETAILED ACTION

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 13 is rejected under 35 U.S.C. 102(b) as being anticipated by Gunjima et al 5587816.

Claim 13 is a method which lists the steps of providing each component, so is met by any reference that discloses the components themselves, as the steps of providing the components listed must be met. Gunjima figure 2 discloses the device of 13 including a light guide plate 3 made of transparent material (it must be other wise it wouldn't work), said light guide plate defining a light incident surface, a light emitting surface and a bottom surface opposite to said light emitting surface (the top, side and bottom surfaces respectively) ; positioning a non-polarized light source beside the light incident surface (1 emits both S&P, that is why the polarizer is required); positioning a pair of prism plates with at least one of said pair being attached to the light emitting surface (13 and 17)

Art Unit: 2871

and positioning a quarter wave plate (4) on the bottom surface with a reflective film 5 opposite thereto. The last phrase "wherein light enters said pair of prism plates at a Brewster's angle so as to achieve a combined refractive light being a nearly pure p-polarized one and a reflected light being an entirely s-polarized one, and wherein the reflected light further is converted to be p-polarized one by said quarter wave plate and further reenters the pair of prism plates to join said combined refractive light. Here the language doesn't say Brewster's angle in respect to what- so the language is met by being at Brewsters angle in respect to the interposing film.

Allowable Subject Matter

Claims 1-12 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

None of the prior art taught or suggested A polarized light source system comprising:

a backlight as claimed with a pair of prism plates with a plurality of micro-prisms substantially meshing with each other, apex angles of the micro-prisms being in the range from 125.degree. to 145.degree. and a quarter wave plate coated with a reflective film opposite to the bottom surface of the light guide plate.

Art Unit: 2871

The backlight sheets that used meshing prisms typically had about 90 degrees for use as polarizers, and other uses would not typically have had the quarter waveplate coated with a reflective film on the back. Gunjima employs opposing prisms, but they are not intermeshed and are employed for light collimation and and diffusion.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
